EURO - i TRACE

Image: euro_itrace

EURO-iTRACE is the Track and Trace solution EPC-France, set up to meet the European Directive 2008/43/EC which will go into effect on April 5 2015.

EURO-iTRACE has the followinig specifications :

- Smart mobile terminals.
- Embedded software in the terminals and pre-configured upstream of the delivery.
- Back-up, training and hotline are provided locally.
- Our system can also include items not produced by the EPC Group provided they meet the recommendations of the FEEM.

The data are systematically sent in a XML file.

Receipt and use of receipt :

- **S1** : the file is sent to customers by email or via web service.
- **S2** : we also offer hosting of the data, and ensure traceability service for the customer via a secure web portal that enables reporting in the form of dashboards and consumption statistics.

Reception storage and use :

- **S3** : an extension of EURO-iTRACE on board terminals enables our customers to track all of the products (including those not produced by EPC-Belgique)
