

## **EURO - i TRACE**

EURO-iTRACE is the Track and Trace solution EPC-France, set up to meet the European Directive 2008/43/EC which will go into effect on April 5 2015.

## **EURO-iTRACE** has the followinig specifications:

- Smart mobile terminals.
- Embedded software in the terminals and pre-configured upstream of the delivery.
- Back-up, training and hotline are provided locally.
- Our system can also include items not produced by the EPC Group provided they meet the recommendations
  of the FEEM.

The data are systematically sent in a XML file.

## Receipt and use of receipt:

- S1: the file is sent to customers by email or via web service.
- **S2**: we also offer hosting of the data, and ensure traceability service for the customer via a secure web portal that enables reporting in the form of dashboards and consumption statistics.

## Reception storage and use:

•	<b>S3</b> : an extension of EURO-iTRACE on board terminals enables our customers to track all of the products (including those not produced by EPC-Belgique)
