# EXPLODER

**EPC-France** sells exploders for setting off medium intensity or high intensity detonators:

- The Schaffler type 815 an 818 to set off only medium intensity detonators, crank-loaded.
- The Schaffler type 861 allows initiating average or high intensity detonators, crank-loaded.

The **exploder MICKO 1 DUAL** is a compact capacitive load. It carries a load circuit and a line test. Battery operated, it can draw MI detonators (150 ohms), HI (5.4 ohms) as well as **NONEL** shock tube detonators. Its versatility makes it effective in all situations.
